

FIG. 1 is a block diagram of a system for certificate validity modification. The system includes a user (100) who provides biometric information (102) to a biometric information processing unit (104). The unit (104) is connected to a server (108) via the Internet (106). The server (108) is connected to a database storage unit (110). The server (108) sends a certificate validity modification request to the user (100) and receives a certificate validity modification admission from the user (100).
